Sainsbury's Allergen Labelling

FIR Regulations

Sainsbury's comply with The Food Information Regulations 2014 (EU) No 1169/2011 (FIC) that came into force on the 14th July 2014. This includes the presentation of allergen information; according to this regulation, for prepacked foods, allergen information must be emphasised in the ingredients list by using a font, style or colour, which ensures they are clearly distinguished from the other ingredients present.

There are 14 major allergens that are recognised across Europe. These are peanuts, nuts, sesame, crustaceans (previously labelled as shellfish), fish, milk, egg, celery, mustard, wheat, rye, barley, oat, spelt, kamut®, soya, sulphites, molluscs. If there is a food product which contains or uses an ingredient, processing aid or is derived from one of the 14 substances, it will need to be declared if still present in the finished product even if in an altered form.

An example label is shown below:

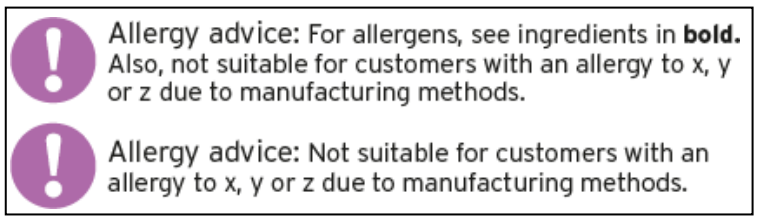

Cross-contamination

Where we believe that there is a real risk of a product having come into contact with allergens that could put a customer with an allergy at risk, one of the following phrases is used in the allergy advice panel:

Allergy advice: For allergens, see ingredients in bold. Also not suitable for customers with an allergy to x, y or z due to manufacturing methods.
Allergy advice: Not suitable for customers with an allergy to x, y or z due to manufacturing methods.

An example label is shown below:

Product guidance for people avoiding GLUTEN

About this list

This list contains Sainsbury's own brand products that are made without ingredients containing gluten. Our suppliers and product technologists have ensured that each product **does not** include gluten-containing grains (wheat, rye, barley, spelt, kamut or oats) or ingredients derived from these gluten-containing grains in the recipe and the risk of contamination with these gluten-containing grains has been effectively managed.

The most up-to-date allergy information is always on the product packaging and you should always check the ingredients list and allergy advice statements on pack at time of purchase.

Please note that the products in our freefrom range all contain less than 20 parts per million (ppm) gluten and we can guarantee this – this is our specialist gluten-free brand. We cannot guarantee that all the other products in this list, outside of the freefrom range contain less than 20ppm gluten but they do not deliberately contain gluten and risk of cross contamination with gluten has been effectively managed.

Important information about breakfast cereals: The own-brand breakfast cereals listed are suitable for a gluten-free diet even though they contain barley malt extract and the allergy advice box states "contains gluten". This is because they have been tested for gluten and only contain a very small amount of gluten (from the barley malt extract) which is at a level that most coeliacs can tolerate.

Important information about oats in freefrom products: We have improved the quality of our flapjacks, granola and muesli by the addition of pure oats. The gluten, wheat and dairy free oats used in this product are high in fibre and have been carefully produced so that they are free from contamination by other gluten containing grains. Most coeliacs can tolerate oats, however you should add them to your diet slowly and consult with your Doctor or Dietitian before doing so, especially if you are newly diagnosed. Products which contain pure oats will display the pink roundel (see below) on packaging.

Using the list

Our Product Guidance Lists features all products that are suitable for people avoiding gluten.

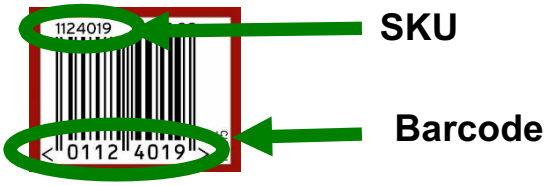

This list ***does not*** include products from the ***In Store Bakery***, the ***service deli***, the ***hot food counters, fresh meat and fresh fish counters***, Sainsbury's ***cafe*** or the ***self-service salad bar***. This is because we advise people with allergies to avoid all of the products sold in these areas due to the potential risk of cross contamination caused by the open food handling.
Within the list, the products are divided by categories e.g. Fresh Meal Solutions, Dairy, Biscuits etc.

The first column contains the **barcode** that appears on pack.
The second column of the list contains some numbers, used internally by Sainsbury's, called **SKUs**. Each product has a unique SKU number and this may help the Sainsbury's colleague in store or on the customer service desk help you identify the product you are looking for.
The third column is the product description. This is the name of the product that appears on the front of pack and it also includes the weight of the product.

How to search for products or product types

If you are viewing this on a computer all you need to do is press Ctrl and the letter 'F' (For mac computers press the 'Command' button and the letter 'F'). A box will then appear where you can type the name of the product, or type of product you are looking for and then press search. The computer will automatically find it for you if the product is included in the list.

How to identify the exact product from the list, when you're doing your shopping:

Sainsbury's sub-brands and abbreviations used in the list:

basics. This is a wide range of staple products across food and GM, with Sainsbury's quality at the lowest price. Basics maintains our universal appeal and helps budget conscious shoppers lower the cost of their weekly shop. Customers should not have to compromise on their health or sourcing values - which is why basics foods are free from hydrogenated fats and artificial flavour enhancers, and are sourced with integrity

Taste the difference (abbreviated in the list to Ttd). This is Sainsbury's premium offering of food & drink, giving customers a wide range of high quality, fantastic tasting products. Our teams take time, care & attention to ensure we source the best ingredients & recipes from around the world, to deliver an outstanding taste experience.

be good to yourself (abbreviated in the list to bgty). This is Sainsbury's healthier option range where we have developed great tasting everyday essential products which are better for you because we have controlled the levels of fat, saturated fat, sugar and salt without compromising on taste. All products will either be less than 3% fat or reduced fat (containing at least 30% less fat than the standard equivalent product).

My Goodness. This is Sainsbury's 'naturally good' brand, targeted towards a customers looking for health through delicious, naturally good products. The products offer customers more of the nutrients and foods that we typically lack, such as fruit, vegetables, fibre, Omega 3, vitamins and minerals and controls what we eat too much of, being low in saturated fat, salt and sugar.

freefrom. Sainsbury's were the first major supermarket to introduce an own label free from range back in 2002. This range today now includes over 100 products that have all been specially made without wheat or gluten and most are also made without milk. Products are suitable for coeliacs and people with a wheat allergy. Most are also suitable for people with milk allergy or lactose intolerance. All our products are developed in strictly controlled environments, ensuring we never compromise on safety, quality or taste.

Sainsbury's SO Organic. Food you can trust. This is Sainsbury's range of products where we have developed an organic alternative to most mainstream products. All organic farms and food companies are inspected at least once a year. The standards for organic food are laid down in European law, so a licence is required to grow process and market organic products. Farming practices aim to encourage wildlife and promote optimum soil health.

Common ingredients to avoid if you have an allergy to gluten

This list isn't exhaustive and there may still be other sources of gluten you should avoid - always check the ingredients list and allergy advice box.

Wheat flour	Rye flour	Barley flour	Oat Flour	Semolina	Durum wheat
Oat bran	Wheat starch	Bulgur wheat	Cous cous	Liquorice	Wheat rusk
barley groats	Blocked barley	Pot barley	Pearl barley	Husked barley	Beer & Lager
Porridge oats	Oatmeal	Soy sauces	Einkom/Emmer	Rye	Spelt

If you have coeliac disease, the following ingredients are safe for you:

There are certain ingredients which are made from gluten-containing cereal but the grain has been processed in such a way that all the gluten has been removed. The European Commission has worked with the European Food Safety Authority (EFSA) to confirm that these ingredients are safe for people with coeliac disease.

- glucose syrups derived from wheat or barley including dextrose
- wheat-based maltodextrins
- distilled ingredients made from cereals that contain gluten. I.e. alcoholic spirits such as whiskey

Nutritional Information

You can get all the nutrients you need from a gluten free diet as long as you swap staple foods made from wheat and other gluten-containing grains, for wholegrains and nutritious starchy carbohydrates. This includes rice, corn (maize), polenta (cornmeal), buckwheat, millet, quinoa, potato, sweet potato, fortified breakfast cereals (i.e. cornflakes and rice crispies). Gluten -free bread, rice, potatoes, gluten-free pasta and other starchy foods should be included at each meal and provide the bulk of your calories each day.

It can often be hard finding alternative sources of fibre to whole-wheat on a gluten free diet, so here are some tips to increasing your fibre intake: you should try to include foods in your diet that are high in fibre such as brown rice, wild rice, beans and lentils, and more fruit and vegetables. If you have been diagnosed with coeliac disease or IBS, check with your GP or dietician before increasing your fibre intake.

Sources of further information

If you have any queries about this list or the products contained in it please contact Sainsbury's **Careline 0800 636 262.**

If you would like more information about allergies and intolerances Sainsbury's would recommend either of the charities below:

If you would like more information about allergies and intolerances or coeliac disease Sainsbury's would recommend the charities below:

Coeliac UK is the leading charity working for people with coeliac disease and dermatitis herpetiformis. Their mission is to improve the lives of people with coeliac disease through support, campaigning and research. They will be able to provide you with expert and independent information to help you manage your health and diet.

Supporting people with severe allergies

The Anaphylaxis Campaign is a national charity launched in 1994 to raise awareness of severe allergies, particularly food allergy. The Campaign maintains a regular dialogue with the UK food industry, prominent medical figures and the Food Standards Agency. Newsletters, fact sheets and product alert bulletins are sent to the Campaign's 8,000 members, the majority being the parents of children with severe allergy. There is a telephone helpline and a website.

The Anaphylaxis Campaign
PO Box 275, Farnborough, Hampshire, GU14 6XS
Telephone: 01252 542029
Website: www.anaphylaxis.org.uk www.cateringforallergy.org.uk

Allergy UK is the leading medical charity for allergy and intolerance sufferers and we are here to help you. With over 80,000 people on our database we are very experienced in providing advice, information and support to those who suffer from any type of allergy or sensitivity.
